

Medical Applications Overview

GETTING TO KNOW US

LISK Has Over 50 years as a global provider of customised solenoids, solenoid valves and LVDT sensors for medical and industrial applications. With offices in USA and Ireland, we support customers and applications in over 30 countries today.

LIQUID CONTROL AND MANAGEMENT

For many applications, precise control and reliability around liquid flow are critical to successful outcomes. With office in the USA and Ireland, we support customers and applications in over 30 countries today.

TARGET MEDICAL APPLICATIONS FOR LISK INCLUDE:

- 1 Ventilators and Respirators
- 2 Anesthesia Equipment
- 3 Infusion Therapy
- 4 Dialysis Equipment

Medical Applications Overview

ENGINEERING

We have multi-discipline engineering teams capable of designing, prototyping, and simulation to ensure the product meets or exceeds specifications.

MANUFACTURING

We have the manufacturing capabilities to receive incoming raw materials, confirm composition, machine to detailed specifications, assemble (welding, bonding, molding, brazing), plate for environmental protection, inspect, test, and ship.

TESTING

Overseeing all of these efforts is an extensive Quality Department utilizing state of the art measuring equipment and techniques for detail part and final assembly conformance to drawings and specifications. We also conduct extensive testing to support your validation and certification processes.

YOU'LL BE AMAZED AT WHAT WE CAN ACHIEVE. **TOGETHER.**

We've invested substantially in equipment, facilities and the quality standards to deliver on your requirements. This enables us to maintain complete control of the products we make for you. The result is an extremely broad range of capabilities, all designed to allow us to deliver every order according to specification – on time and on budget.

SO LET'S TALK, ENGINEER TO ENGINEER

We would be delighted to learn more about your current application, functional improvement requirements and longer term development ideas. **Talk to us today.**
